

# Gotcha Covered®

Blinds • Draperies • Shutters

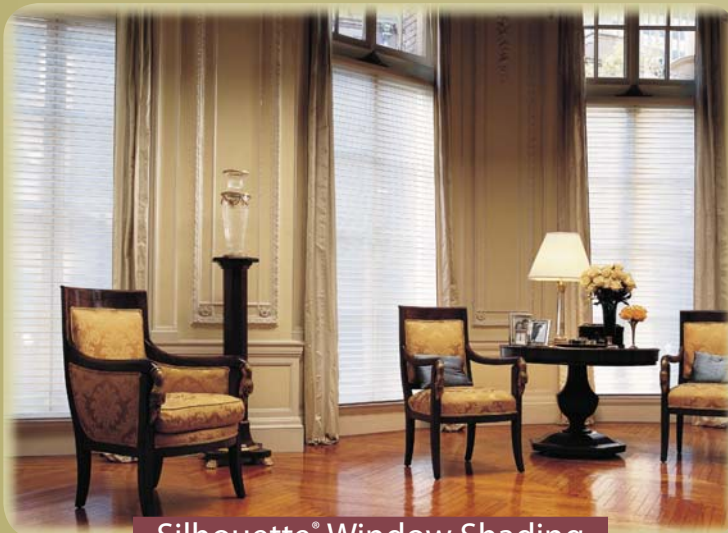

**Plantation Custom Shutters**

Plantation shutters are a beautiful combination of style, versatility and durability that add a warm, rich dimension to any setting. They are available in many different configurations: Bi-Fold track system, Bi-Pass track system, Double-hung windows, Café windows, Bay and bow windows, French and patio doors. They are rich with color finish choices and available with matching arches.

**Traditions™ Wood Blinds**

Warmth, style, natural beauty; Traditions™ wood blinds are the natural choice for a classic, timeless look, whether your décor is formal or casual. Built with an attention to detail that lasts a lifetime, Traditions blinds are crafted from the finest North American basswoods, hand-selected and individually inspected. Choose from a beautiful color palette of rich wood stains, lustrous paints, and unique sandblasted finishes.

**Silhouette® Window Shading**

Ever since its introduction in 1991, the exquisite Silhouette® product line has been constantly expanding to respond to the ever-growing needs and preferences of fashion-conscious consumers. Today, there's at least one Silhouette fabric color that's the perfect choice for any room or decor. There are seven fabrics, ranging from neutrals and pastels to intense hues, with distinct textures and varying degrees of light control.

**The Manhattan® Collection**

The Manhattan® Collection brings Duette to new levels of elegance, offering stunning fabrics for sophisticated taste. You can opt for the texture and richness of raw silk, or the lush look of fine satin, in distinctive yet subtle patterns.

**Cordless Blinds**

Spring-motor activation offers easy operation with a simple push or pull on the bottom rail. Elimination of lift cords makes these shades child and pet safe. This Cordless feature is available on a variety of different window fashions.

### Classic Supreme™ Aluminum Blinds

On the surface most aluminum blinds are the same. They get dusty, sometimes get scratched and occasionally they get stained. The cause: electrostatic buildup and simply day-to-day usage. The paint finish on Graber aluminum blinds does more than just reduce dust buildup, this finish actually repels dust, resists scratching and staining. The privacy feature gives you superior privacy and light control because the holes actually disappear when the blinds are closed.

### Fauxwood Blinds

Made of unique blends of vinyl and wood, these blinds combine the beauty of real wood with the durability of non-wood blinds. Choose fauxwood blinds for areas of high humidity, as these blinds won't warp. A wide selection of stains and colors enhance your decorating scheme in any room.

### Classique Plus™ Wood Blinds

Kirsch wood slats are crafted from premium kiln-dried hardwoods to resist warping and provide smooth finishes. Three choices in cornices offer upscale, traditional and classical styling. They have an exclusive triangle bottom rail for tighter closure and increased privacy. They accent your window fashions with decorative cloth tapes. Coordinating or contrasting solid colors and patterns add definition for a sharp designer look.

### PowerRise®

This ever-popular, battery operated remote control system is now available with a timer. This means you can program your blinds to stop anywhere between the open and closed position, any time during the day or night. The system completely eliminates lift cords, removing the temptation for children to reach out and grab them. There's also a built-in safety stop that automatically halts the shade if anything enters its path.

### EvenPleat® Shades

The Graber EvenPleat® is the perfect pleated shade; its patented design keeps every pleat crisp and uniformly spaced, from top to bottom. A special spacer ladder runs up the back of the shade, supporting individual pleats and preventing the fabric from sagging or stretching-forever! EvenPleat® shades are backed by a factory lifetime warranty.
